Graduated : 2016

SKILLS:

- **Python:** Proficiency in Python, as Odoo is built using Python.
- **XML:** For defining views and layouts in Odoo.
- **JavaScript:** For front-end customization and client-side logic.
- **HTML/CSS:** Basic knowledge to customize front-end user interfaces.
- **PostgreSQL:** Strong understanding of PostgreSQL, which is the default database used by Odoo.
- Ability to create and consume **APIs**.

PROFILE:

Odoo developer with over 2+ years of experience in complex customizations and strong problem-solving abilities. A fast learner, constantly upgrading skills and staying updated with the latest technologies. Adept at delivering optimized Odoo ERP solutions tailored to business needs, with a focus on efficiency and innovation. Eager to take on new challenges and grow further.

EXPERIENCE:

Tecfuge Business Solution

Tecfuge Business Solutions 43/3437, Puthiya road, above
Fresenius Kabi, NH bypass, Kerala
May 2022 - Present

Event Management

- **Exhibitor Portal Development:** Created a portal for exhibitors to submit invitation letters, handle hotel booking, manage shipping details, and upload branding panel information.
- **REST API Development:** Built and integrated REST APIs to seamlessly sync leads from WordPress into Odoo, while also collecting visitor registrations for events.
- **Customized Email Templates:** Designed tailored email templates for exhibitors, including automated follow-up emails, enhancing communication and engagement.
- **Badge Customization:** Developed personalized badges for visitors, exhibitors, and contractors, facilitating smoother event access and identification.
- **Custom Reporting:** Implemented customized reports, such as invoices and agreements, to align with exhibitor requirements and improve documentation accuracy.
- **Real-time Attendance Management:** Built and deployed real-time attendance tracking modules for visitors and exhibitors, ensuring seamless check-ins on event days.
- **Onsite Support in Dubai:** Provided comprehensive onsite technical support during large-scale events in Dubai, ensuring smooth coordination and immediate resolution of technical issues for exhibitors and event organizers.

Point of Sale

- **Onsite Implementation(Oman) of Gun Manufacturing and Trading Project:** Successfully implemented Odoo ERP for a gun manufacturing and trading company, covering key modules such as **inventory, accounting, point of sale, and maintenance.**
- **Custom Reports and Widgets:** Developed customized reports and widgets tailored to specific business needs, providing detailed insights and improved user interfaces.
- **Onsite Device Integration:** Integrated various devices onsite, including Zebra printers for streamlined label printing and Emirates ID card integration for efficient user identification.
- **Preprinted Invoice Module Implementation:** Developed and implemented a module for preprinted invoices, streamlining the invoicing process and enhancing the efficiency of document handling.

General Modules

- **General Module Implementation and Maintenance:** Successfully implemented and maintained core Odoo modules such as sales, **purchase, inventory, and accounting** across various industries, including **toy selling, electronics shops, light shops, insurance companies, real estate, and clubs.**
- **Database Migration:** Executed database migration from Odoo 13 to Odoo 16 on Odoo.sh, ensuring data integrity and system compatibility throughout the process.
- **Experience Across Odoo Versions:** Proficient in working with multiple versions of Odoo, including Odoo 13, 14, 15, 16, and 17, contributing to various projects and enhancements across the platform.

May 2021 – May 2022

- **Odoo Training:** Completed comprehensive training in Odoo, covering various functionalities and best practices.
- **Experience Across Odoo Versions:** Proficient in working with multiple versions of Odoo, including Odoo 13, 14, 15, 16, and 17, contributing to various projects and enhancements across the platform.
- **Maintenance and Server Deployment:** Developed skills in maintenance and server deployment, ensuring optimal performance and reliability of Odoo installations.

Apping Technology: Shilp Zaveri, 611, near Shyamal Cross
Road, Swinagar Society, Nehru Nagar, Shyamal,
Ahmedabad, Gujarat 380015 Dec 2024 – August 2025

- **POS screen customization in** Odoo 17 using OWL JS framework
- **QWeb report customization** for dynamic receipt and invoice designs
- **Real-time product** updates on the POS screen using WebSockets
- **Parameter tampering prevention** to ensure secure transactional flows

- **Built a basic in-house AI chatbot (LLM Agentic AI)** system to automate Odoo Operations and internal communication, using only open-source tools and no external APIs.
 - Used open-source LLMs like Ollama, DeepSeek, SQLCoder-7B, and Mistral-7B, all running locally
 - Created an agent-based system (like Amazon's Strand Agent) to handle different tasks
 - Added features like context-based replies, real-time updates, and simple memory handling
 - Used Google Colab for model testing and development
 - Automated HR tasks such as onboarding, leave requests, and policy queries using a custom MCP protocol
- Ensured full privacy and control by avoiding all external APIs
- Built backend tools and customization using Django
- **Customized Blade templates in Laravel** to build dynamic, reusable front-end views with layout inheritance, conditional rendering, and data binding.
